Once in WebCATS, you can choose from the following inqueries:

Weapon System (WSDC) Inquiry:
Use this to find NSNs for specific weapon systems. Query by service, platform, program manager, and Weapon System Designator Code (WSDC).

National Stock Number (NSN/NIIN) Inquiry:
This will give you associated weapon systems and detailed information about specific NSNs. View the latest item manager information through the Item Notes/SIMI button.

Requisition Inquiry:
Query by your specific DODAAC/UIC to obtain a detailed list of all active requisitions. Structure your query by entering specific information. View the latest status of specific requisitions.

Supportability Analysis by Weapon System:
Track specific NSNs associated with special projects by obtaining an NSN Detail Review or a Supportability Review with Item Notes.

Special Program Requirements (SPR) by DODAAC:
Obtain a list of all the SPR document numbers and detail data for a specific DODAAC.

Order Placement:
Place your A0A and A0E exception type requisitions directly on-line.

Weapon System Information:
View a calendar of upcoming events for a specific weapon system. View trip reports, weapon system specific metrics, and weapon system support team POC lists.

To check status of a stock number, simply click on the National Stock Number Inquiry choice:

The following screen will appear asking for either the full NSN or NIIN you wish to query. Type it in without dashes, and click query.
